

## 2. WINDING, TEXTURIZING and TWISTING MACHINES

### 1.1 – HANK TO CONE WINDERS

#### 2.1.09.087

##### No. 2 Hank to Cone Fadis winders

No. 1 winder 21 heads

No. 1 winder 12 heads

6" traverse - conical package 5°57-

Mex weight hank Kg. 1,000

Mechanical slub-catcher

Waxing device

#### 2.1.09.088

##### Hank to Cone Corghi winder model ICL – y.o.c. 1996

24 heads - 6" traverse - conical package 5°57-max. diam.

290 mm

Double positive feeder

Stop at diameter

One motor per head with slow start

Soft start with acceleration ramp 15 sec.

Hank 340 mm - circumference min. 1100 max 1800

Potentiometer for speed adjustment : from 150 to 700 m/m

30% automatic reduction speed per position

Head stop at required diameter

Mechanical slub-catcher with micrometer adjustment

Motorized waxing device

Hank length adjustable per each position

Splicer

Ref. 5.4.04.088\_22

##### No. 1 Hank to cone

##### Corghi winder mod. E-4/24 - yoc 2005

8 heads with electronic speed variation
